# WORKER APPLICATION

LAX-GLOBII

IDÉAL POUR:

- Workers on the field
- Maintenance rounds
- Contractors on your sites
- Site supervisors
- Staff on the move
- Workers at risk

PRINCIPALES FONCTIONNALITÉS

- Send photos, SOS messages or location at the press of a button
- User statuses (Busy, Available, Away, etc.)
- QR Code scanner for circle checks
- Chat communication with supervisor
- Interaction with BLE beacons
- Remote settings management

Turns your smartphone into a worker LWAD

The application is installed on a mobile device, transforming it into a part of a comprehensive personal monitoring system. The user tracks field employees, sends tasks, and controls their execution. All settings are located in a separate Configurator web app, so the integrator has remote 24/7 access to the app configuration and diagnostics.

Web & Mobile management

- Web and mobile alerts
- Event reports
- Various notices
- Quick management and set up
